IC Cross Reference Book
From the Engineers of Howard W. Sams & Company
A complete guide to IC and module replacements and substitutions from the makers of PHOTOFACT® service documentation! This easy-to-use reference guide is the most comprehensive guide available for engineers, technicians, and anyone who works with ICs and modules.
The features of the IC Cross Reference Book include:
• An easy-to-use cross reference guide.
• More than 35,000 part and type numbers listed.
• Part numbers for the United States, Europe, and the Far East.

Section 2:
Replacements **Pages 71--168**

Jameco Part number 124679

How to Use This Book

To find a replacement or substitution for an IC or module, follow these simple steps:

1 **Locate the part number stamped on the part** you wish to replace, or find the part number in a parts list.

2 **Look up the part of type number in Section 1** of this guide. To the right of the number will be a replacement code/block number.

3 **Look up the replacement code/block number in Section 2** (pages 71-168). The ICs listed are pin-for-pin compatible to each other. (Use insulating hardware and/or heat sinks if necessary. Observe all other antistatic and safety precautions.

Other Important Information

The engineering staff of Howard W. Sams & Company has assembled this cross-reference guide to help you find replacements or substitutions for more than 35,000 ICs or modules.

It has been compiled from manufacturers' data and from the analysis of consumer electronics devices for PHOTOFACT (R) service data, which has been relied upon since 1946 by service technicians worldwide. Here are some important notes to help you use the two sections of this book effectively.

Section 1--Original IC or Module Part or Type Numbers

This section lists IC or module part numbers in alphanumeric order by manufacturer's part number, type number, or other identification, including numbers from the U.S., Europe, and the Far East. At the right of the part number is a replacement code/block number that you will use to look up comparable replacements in section 2.

Section 2--Replacements

This section provides substitutions and replacements for the ICs and modules listed in Section 1. This information was developed during PHOTOFACT(R) analysis and is the most complete replacement guide available.
